

# Poeta Errante Chronicles WRITEUP

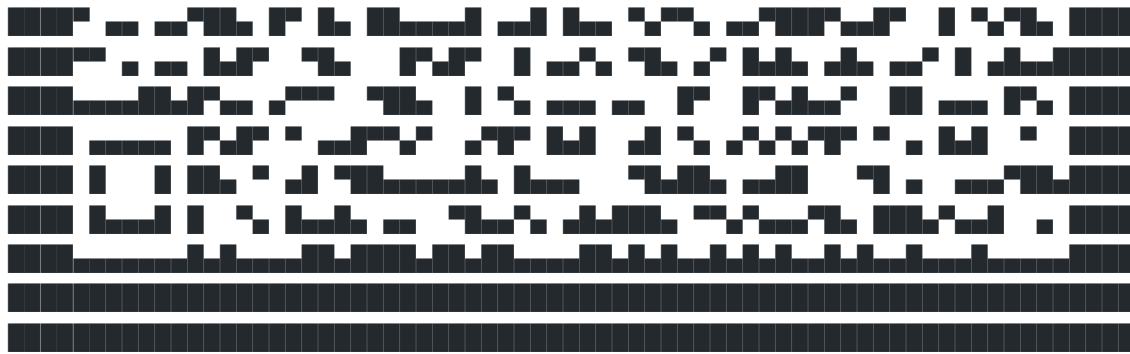

---

The challenge starts with a netcat connection, there are just a few simple questions to answer, this is the order of the simple ones:

- north
- go to screaming man
- help poeta errante
- check piece of paper

From here the paper was an hex output. A simple decode from hex given us a QrCode.

Scanned the QrCode we have an address:

Via Vittorio Emanuele II, 21

The address allow us to continue. Other answers:

- look around
- open mailbox

From here we had a little logic game:

3871	1 correct digit and in right position
4170	1 correct digit and in wrong position
5028	2 correct digits and in right position
7526	1 correct digit and in right position
8350	2 correct digits and in wrong position

After some reasoning we found that the correct code was 3029. Other answers:

- save the history
- destroy letter
- yes
- yes
- hug poeta errante
- yes

At the end of this riddle we have a dump, it looked like a packet dump and it was a correct

guess. We opened the dump with WireShark and found the flag inside the TCP packet stream:

```
{FLG:i7430prrn37343<}
```

We submitted, but it wasn't correct. Two packet were swapped in position, after changing them, the actual flag should be

```
{FLG:i7430prrn33743<}
```

Finally it was accepted and the challenge was solved.
